Associatief schijven - 7 oktober

This morning I sent out a concept for a “potential project for in November. I am annoyed that the proposal is not what I complete wanted it to be, and therefore an not sure what there reaction will be. Tip top shape is what I want when sending out a concept. Hopefully they will choose my ideas .

I really need money therefore I really need to find work. I dont want to work for 14 euro I want to work for at least 16. But there is no way I am going to find this type of work unless I decide to work for the gamma type stores and that something I really dont want. Just not me. What do I do. I also need to find a soccer team I have not even looked into it yet but I keep not doing it because its just not handy. But like what am I doing then… no work no football, I already need one. Well actually I need both because I want to buy bike parts swell. I also want a gym membership.
